Dear Professor

I writing in relation to my thesis that has been completed as part of a Doctorate of Medical Science through your department. The thesis is entitled:

**How information technology improves the quality and efficiency of medical care and research**

Please find attached a revised thesis with tracked changes, as well as an index of changes. You will note that there are several grammatical or other minor changes that have been made in addition to the comments by examiners that do not affect the content of the thesis.

I appreciate your input on its suitability for submission as a final thesis document.

Kind regards

Dr Richard Khor
