Dear Dr. Ferrari,

Your application entitled “Gaming my way to recovery: Understanding how to integrate video game technologies into youth mental health services”, submitted to the *Request for Proposals: e-services within Integrated Youth Service Models* competition, has been considered by the NCE-IKTP Youth Mental Health (operating as "Frayme").

In July 2018, the Leadership Team reviewed and approved it to move to the KMb Committee, with a couple of slight revisions:

- Revise the proposal and research questions to create a more neutral approach/vision toward video game technology/intervention for youth mental health.
- Describe the potential of this project to inform and support stepped care activities currently underway by Frayme

The revised version of your proposal was received on August 2018. The KMb Committee reviewed the application. The KMb Committee, a Board subcommittee approved your proposal for Frayme support.

Sincerely,

A handwritten signature in black ink that reads "Paula Robeson".

Director of Operations
Frayme
