Correction to: *Nature Communications* <https://doi.org/10.1038/s41467-020-18723-y>, published online 1 October 2020.

The original version of this Article contained an error on page 5 of the Results section, which incorrectly read ‘They are characterized by craniofacial dysmorphisms (9/10), thin vermilion border and lips (4/7), and feeding difficulties (6/11), and exhibit neonatal hypotonia (10/7)’. The correct version states ‘They are characterized by craniofacial dysmorphisms (9/10), thin vermilion border and lips (4/7), and feeding difficulties (6/11), and exhibit neonatal hypotonia (7/10)’.
